

Schnelle und einfache

Browser Tests

mit CodeCeption und Docker

Was sind Browser Test

Was sind Browser Test

docker-compose.yml (1/2)

```
version: '3.5'

networks:
  frontend:

services:
  codeception:
   image: ambimax/php7.0-cli-stretch:7.0.31
  entrypoint: codecept
  working_dir: /var/www
  volumes:
        - "${PWD}:/var/www"
        networks:
        - frontend
```

docker-compose.yml (2/3)

```
zalenium:
  image: "dosel/zalenium"
  privileged: true
  tty: true
  volumes:
    - /tmp/videos:/home/seluser/videos
    - /var/run/docker.sock:/var/run/docker.sock
    - /usr/local/bin/docker:/usr/bin/docker
  expose:
    - 5555
  ports:
    - 4444:4444
 command: >
    start --screenWidth 1930 --screenHeight 1090
          --timeZone "Europe/Berlin"
          --videoRecordingEnabled true
          --sauceLabsEnabled false
          --browserStackEnabled false
          --testingBotEnabled false
          --startTunnel false
  networks:
    frontend:
      aliases:
        - zalenium.docker
```

Start Zalenium

docker-compose up -d

Bootstrap CodeCeption

docker-compose run codeception bootstrap

```
actor: AcceptanceTester
modules:
  enabled:
    - WebDriver:
        url: 'https://www.ambimax.de'
        host: zalenium.docker
        port: 4444
        browser: chrome
        window size: 1024x768
    - \Helper\Acceptance
```

Testvorlage (Cest) generieren

docker-compose run codeception generate:cest acceptance Home

Generierte Cest-Testvorlage in tests/acceptance/HomeCest.php

```
<?php
class HomeCest
    public function _before(AcceptanceTester $I)
    public function _after(AcceptanceTester $I)
    // tests
    public function tryToTest(AcceptanceTester $I)
```

Schreiben eines ersten Tests in tests/acceptance/HomeCest.php

```
// tests
public function tryToTest(AcceptanceTester $I)
    $I->wantTo('test our homepage');
    $I->lookForwardTo('see our slogan');
    $I->amOnPage('/');
    $I->see('Wir machen Digitalisierung.');
```

Acceptance-Tests starten

docker-compose run codeception run acceptance

Testergebnis

Codeception PHP Testing Framework v2.4.6

Powered by PHPUnit 6.5.9 by Sebastian Bergmann and contributors.

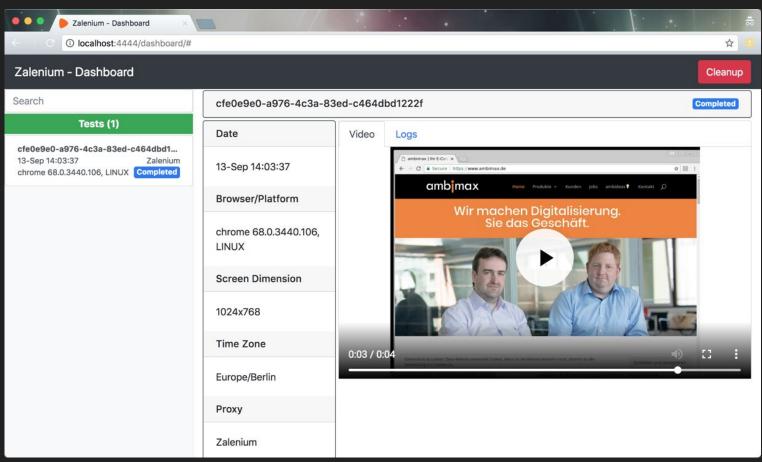

Acceptance Tests (1) ------

✓ HomeCest: Test our homepage (1.71s)

Time: 3.69 seconds, Memory: 10.00MB

OK (1 test, 1 assertion)

Tests als Video anschauen

Acceptance-Tests starten

docker-compose run codeception \
 generate:cest acceptance GoogleTest

Google Suche in tests/acceptance/GoogleSearchCest.php

```
// tests
public function tryToTest(AcceptanceTester $I)
    $I->wantToTest('search for ambimax');
    $I->amOnUrl('https://www.google.de');
    $I->seeElement('input[name=q]');
    $I->fillField('input[name=q]', 'ambimax');
    $I->pressKey('input[name=q]', WebDriverKeys::ENTER);
    $I->see('www.ambimax.de');
    $I->see('ambimax® GmbH');
    $I->see('Konrad-Zuse-Str.');
```

Nur einen bestimmten Acceptance-Tests starten

docker-compose run codeception run acceptance GoogleTestCest

Testergebnis

Codeception PHP Testing Framework v2.4.6

Powered by PHPUnit 6.5.9 by Sebastian Bergmann and contributors.

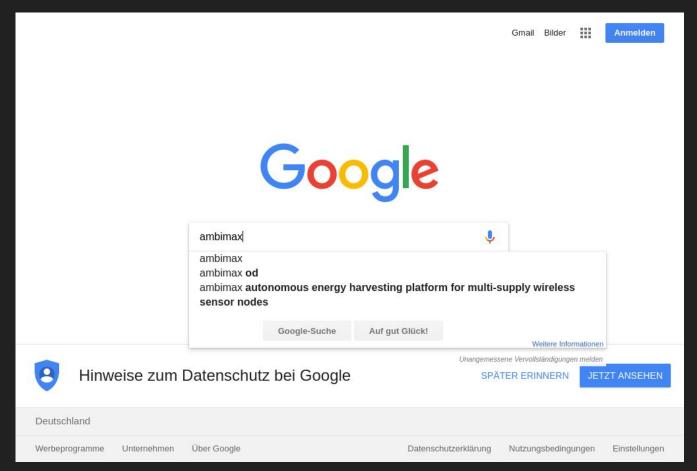

Acceptance Tests (1) ------

✓ GoogleTestCest: Test search for ambimax (2.69s)

Time: 4.3 seconds, Memory: 10.00MB

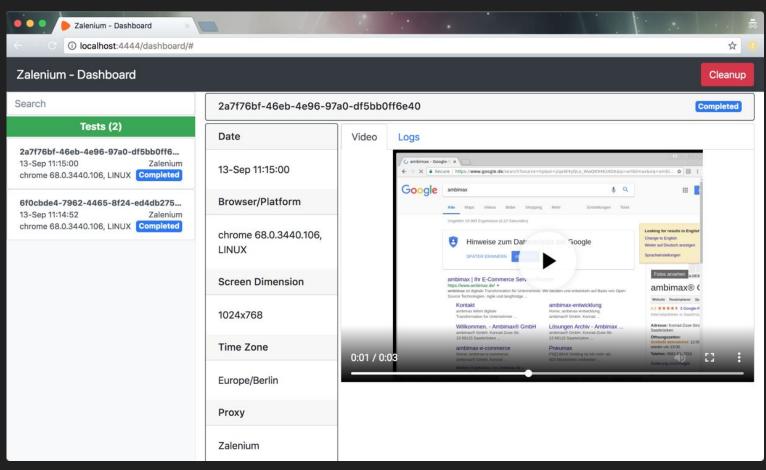

OK (1 test, 1 assertion)

Automatischer Screenshot bei Fehlern in tests/_output

Tests als Video anschauen

Tipp: PageObjects zur Vereinfachung von Layout-Änderungen

```
<?php
class TodoTaskPage {
   const URL = '/tasks';
    static $addButton = 'Add';
    static $newField = 'New Task';
    static $list = '#tasks';
```

Tipp: PageObjects zur Vereinfachung von Layout-Änderungen

```
$I->wantTo('create todo task');
$I->amOnPage(TodoTaskPage::URL);
$I->fillField(TodoTaskPage::$newField,'Update a blog');
$I->click(TodoTaskPage::$addButton);
$I->see('Update a blog', TodoTaskPage::$list);
```
